

Getting to Know a Scholar: 2/22-2/28/16

Robert Compton is from Lawrenceville, GA and attended Mountain View High School from which he graduated in 2013. He is double majoring in Computer Science and Business. His favorite courses are computer science courses with difficult problem solving components, math, physics, and chemistry. Robert is an avid swimmer, rock climber, and plays the piano. He chose his majors because he wants to be on the forefront of human computer interfaces. He chose ASU because both of his parents attended school here and he had a strong connection to the mountains upon visiting campus.
